INSTRUCTIONS

1. Trace on the T-Rex Pattern using either NCR paper or a tissue paper transferring technique before doing the prints so that you know where to place the feet.
2. Working one at a time, cover the bottom of the baby's feet using a brush and a heavy application of Sea Mist. Stamp the feet down as shown in the photo.
3. Use silkscreen medium to thicken up Mocha Java, Gecko Green, and Blue Ice. You're looking for a pudding like consistency.
4. Apply the palm trees where desired and use just the top of the trees around the bottom to give the look of plants.
5. Next, fill in the belly of the dinosaur with 2 coats of Gecko Green.
6. Fill in the heart with 2 coats of Coral Reef.
7. Next, fill in the remainder of the T-Rex with 3 coats of Sea Mist, working around the footprints.
8. Use your liner brush to outline your dinosaur.
9. Finally Use your detail brush or a detail writing bottle to apply your words as well as the child's name and age.

TIPS

- Be generous with the paint to get the most even color.
- Make sure that the thickened paint is the consistency of pudding to get the best result – please rinse out the screen between colors.
- Even pressure on the liner brush will help you get an even line. You can also make a cute broken line to make it faster and more whimsical.
